Abstract (en)

[origin: CN203782402U] The utility model relates to a device for coating and/or soaking a fabric material (1). The device is provided with a pull-in mechanism (2), at least one application mechanism (3) and a thermal treatment device (4), wherein the application mechanism (3) is used for applying a finishing agent and is an assembly composed of replaceable modules. The device for coating and/or soaking the fabric material (1) has the advantages that the device can be rapidly refitted to be suitable for different application types, and during refitting, labor cost is small.
