Abstract (en)  
[origin: WO2014184707A2] The present invention relates to a filter unit particularly to a filter unit with the household appliance, and more particularly to a filter unit with the condensate drying apparatus comprising a body and a filter means. It is provided for according to the present invention that a body (18) is formed as a relatively thin frame (20) a filter means (19) can be removably inserted therein. Said frame (20) is formed at the first side thereof at the lower longitudinal border (23) with a spaced and approximately vertically extending wall (22) so that the latter and said frame (20) form a trough (24), at least one section of the trough (24) being formed with an additional filter means (27).
