Abstract (en)
[origin: CA2910914A1] The invention relates to a concrete sleeper (1) for a solid carriageway (23), having a fixing block (12), which is inserted with the upper section thereof into an underside recess (9) in the concrete sleeper (1), is mounted elastically by means of a ring (14) produced from an elastomer and which can be inserted with the lower section thereof into a fillable cut-out (19) in a top layer of the solid carriageway (23), wherein a base (7, 8) consisting of an elastic material is arranged on the underside of the concrete sleeper (1).
