Abstract (en)

[origin: WO2014187528A1] Disclosed is a rail-loading train for transporting long-welded rails (5). A securing device (13) for anchoring the rails (5) is arranged on said rail-loading train. The securing device (13) is composed of a number of clamping devices (14), each of which is provided for anchoring an individual rail (5). The clamping devices (14) are designed so as to be movable relative to the rail-loading train in a longitudinal direction (11) of the wagon by means of a sliding drive (15).
