Abstract (en)
[origin: WO2014184284A1] The invention relates to a connector (100) for motor vehicles. More specifically, the invention relates to a connector comprising a terminal-bearing housing, a cable-guide cover (140) and a lever (120) assisting the coupling. The cable-guide cover (140) comprises a catch (190) for keeping the lever (120) in the coupling position. A pin is inserted on the cable-guide cover (140), under the catch (160), to immobilize the latter and lock the lever (120) in the coupling position. The cable-guide cover (140) has an orifice (146) through which the pin is introduced and at least one rail (171, 172, 173) for guiding the pin as it is inserted and for holding it in position.
