Abstract (en)
A ski carrier (10) for carrying a pair of skis (36) is described. The ski carrier (10) comprises a pair of ski poles (12), each having an elongated shaft (16) and a handle (22) that can be attached in a first and a second orientation relative to the shaft. The first orientation is suitable for skiing. Each ski pole further has a wheel (24) with an axis of rotation (26) that is transverse to the shaft in the second orientation. The ski carrier further has a lock (46) for releasably locking the handles together so that they can support the pair of skis and functions as a rolling cart.
