Abstract (en)

The invention relates to a method for controlling a treatment process for textile products, preferably in an apparatus for treating textile products (1), wherein the treatment process comprises the step of ironing textile products in an ironing arrangement (1000) with at least one ironer (1200, 1300, 1400), wherein textile products are conveyed from an introduction side to a discharge side at a treatment speed and wherein a treatment pressure, and preferably a treatment temperature, is applied to the textile products and wherein the method for controlling comprises the step of controlling the treatment speed, treatment temperature, treatment pressure and/or further treatment process parameters and/or the operation of further elements of the apparatus via a control unit (800), characterized by the steps of generating a sensor signal via a sensor connected to the control unit, transmitting the sensor signal to the control unit and changing the treatment pressure via the control unit depending on the sensor signal.
