Abstract (en)

[origin: WO2014188126A1] The invention concerns a connector (3) for an infusion bag (1) comprising at least first and second tubular bodies (4, 5) each forming an access opening and a base (6) extending around said first and second tubular bodies (4, 5), said base (6) being formed from a plate (7) comprising a welding area (8) intended to be welded to the walls of an infusion bag, the plate (7) further comprising a gripping area (9) that extends outside said welding area (8) between the first and second tubular bodies (4, 5), said gripping area (9) having a sufficient size and rigidity to allow gripping.
