Abstract (en)

[origin: WO2014188455A1] A woven net comprises a plurality of net meshes, each of which is defined by a polygon with at least three sides and as many knots which connect a net mesh to adjacent meshes. Each side is formed by a chain comprising at least a first yarn that forms a primary interlacement of the chain, and at least a second yarn that passes through said primary interlacement of the chain. In at least one portion of a chain of a net mesh said second yarn forms at least one reinforcing interlacement of the chain.
