Abstract (en)
[origin: WO2015003241A1] A jaw assembly is taught, said jaw assembly comprising a lever arm defining a lever arm pocket on a top surface thereof, said lever arm pocket having sides and a bottom face, a cam roller moveable along a cam surface and a die holder removably and pivotably received in the lever arm pocket and having a gripping surface for gripping the tubular, said die holder having sides and a base. Movement of the cam roller along the cam surface serves to pivot the die holder within the lever arm pocket.
