Abstract (en)
[origin: WO2014190031A2] Systems and methods for viewing filters on a collaborative spreadsheet stored on a cloud computing service include accessing, from each of a plurality of client computers, a first sheet of a spreadsheet stored on a cloud computing service, where a plurality of filters is associated with the first sheet. A first client computer in the plurality of client computers receives a command by a first user to apply a first filter in the plurality of filters to the first sheet, and applies the first filter to the first sheet on the first client computer. The filtered first sheet is displayed to the first user, and a second client computer in the plurality of client computers concurrently displays an unfiltered first sheet.
