Abstract (en)

A smoking article comprises an aerosol generating substrate and a mouthpiece in axial alignment with the aerosol generating substrate. The mouthpiece has a rod end adjacent the aerosol generating substrate and a mouth end opposite the rod end. Further, the mouthpiece comprises a tubular element defining a mouth end cavity. In addition, the mouthpiece comprises a first wrapper circumscribing the tubular element around at least the mouth end cavity and one or more holes are provided in the tubular element at the mouth end cavity to expose one or more portions of the inner surface of first wrapper to the mouth end cavity.
