Abstract (en)
[origin: EP2457465A1] The device (1) has a touch-latch assembly (2) with locking means for locking the drawer in closed position. An ejection portion provided for ejecting the drawer out of closed portion comprises a force accumulator for providing an ejection effect. An actuating element (3) is provided for transmission of movements of drawer to touch-latch assembly. A damping element is arranged between the catch element (4) and actuating element for attenuating the force exerted on drawer when the drawer is moved to closed position.
