Abstract (en)
[origin: CN105463813A] The invention relates to a method for operating a washer-dryer, wherein the washing dryer includes: a washing tub 1; a rotatably mounted drum in the tub 2 with a closable glass door 22, the drum 2 is used for receiving and removal of laundry 3 in open glass door 22; a controller 18 and a process air duct 5, in which a heater 7 for heating air, a fan 6, and at least one temperature sensor 14, 15, 16 are for measuring a temperature Tpc comprises; comprising the steps of: (a) measuring a temperature Tpc 1 in the process air channel 5 with the at least one temperature sensor 14, 15, 16; (B) performing a cooling program with the process air in the event that Tpc 1 > = Tpc lim wherein Tpc lim is an upper limit temperature of the process air, wherein the cooling program is continued, reaches to a predetermined temperature Tpc set <= Tpc lim is; and (c) performing a wash cycle. The invention also relates to a container suitable for carrying out this process washer dryer.
