Abstract (en)  
A trimmer blade 30 includes a movable plate 33 and a fixed plate 31. The movable plate has a plurality of movable blades 50 including a first movable blade 50a, and a second movable blade 50b adjacent to the first movable blade. The fixed plate has a plurality of fixed blades 40 including a first fixed blade 40a, and a second fixed blade 40b adjacent to first fixed blade with a fixed blade groove 41 interposed between the second fixed blade and first fixed blade. When at least one part of the first movable blade is located on the fixed blade groove, the second movable blade comes into contact with the first fixed blade. According to this configuration, it is possible to configure the trimmer blade in which blade edges of the movable blades and blade edges of the fixed blades are unlikely to interfere with each other.
