Abstract (en)  
[origin: US2016091159A1] A luminous lighting and/or signaling module for an automotive vehicle, the module comprising first means arranged to produce a first cut-off beam and second means arranged to produce at least two selectively activatable luminous segments, the luminous segments forming a second beam that is complementary to the cut-off beam, when they are activated simultaneously.

Abstract (fr)  
L'invention concerne un module lumineux pour l'éclairage et/ou la signalisation d'un véhicule automobile, ledit module comportant des premiers moyens (2) agencés pour réaliser un premier faisceau (11) à coupure et des deuxièmes moyens (6) agencés pour réaliser au moins deux segments lumineux (34) activables sélectivement, les segments lumineux formant un deuxième faisceau (13) complémentaire au faisceau à coupure, lorsqu'ils sont activés simultanément.
