Abstract (en)
[origin: CN205303354U] The utility model relates to a contactor (10), including main fixed contact support (40) that can move and prestrain fixed contact support (50) that have main contacts unit (47), it utilizes inactive prestrain contact (30) flexibly to hold on explosion chamber component (55) with the aid of prestrain fixed contact support spring (38). This contactor still includes magnet (54), and prestrain fixed contact support (50) can be divided to turn up the soil via it and be connected with the coupling antithetical couplet protruding (41) that main fixed contact support (40) located. The utility model discloses still relate to a cubical switchboard, it is including having a plurality of switching device and at least one the cover tape busbar of contactor.

Abstract (de)
Die Erfindung betrifft ein Schütz (10), umfassend einen beweglichen Hauptkontakteinheitsträger (40) mit einer Hauptkontakteinheit (47), und einen Vorladekontakteinheitsträger (50), der mittels einer Vorladekontakteinheitfeder (38) auf einer Schaltkammerkomponente (55) mit einem statischen Vorladekontakt (30) elastisch aufgenommen ist. Das Schütz umfasst ferner einen Magneten (54), über den der Vorladekontakteinheitsträger (50) mit einem Kopplungsfortsatz (41) am Hauptkontakteinheitsträger (40) lösbar verbindbar ist.
