Abstract (en)

[origin: WO2014187663A1] The invention relates to a method for applying easily cleanable surfaces to domestic articles, said method being characterized in that a polymer surface layer is deposited by means of an atmospheric-pressure plasma onto at least part of the substrate surface of the domestic article composed of glass, enamel, glass ceramic, or metal. The invention further relates to domestic articles, the surface of which has been at least partially coated by means of the aforementioned method.
