Abstract (en)
[origin: WO2014191671A1] The invention relates to a method for changing the configuration of a sexto-type rolling mill, wherein the rolling mill is changed from a first configuration (C1) with a range of diameters of working cylinders (3',4'), keeping the chocks (E1, E2) by returning the chocks (E2) of the intermediate cylinders (5, 6) and by returning the chocks (E1) of the working cylinders. The invention also relates to a rolling mill suitable for the implementation of said method.
