Abstract (en)

[origin: WO2014195649A1] The invention mainly relates to a frame for backrests of back seats of a motor vehicle, which is essentially characterised in that it comprises a main support element (11) forming the frame of a side seat backrest, and an extension support element (30) forming the bottom of a backrest of the middle seat, which is secured to the main support element (11), extending in the same plane, and which comprises an element (33) for receiving two headrest guides. The invention also relates to a motor vehicle comprising at least one such frame for back seats.
