Abstract (en)

[origin: WO2014195339A1] Container (10) for receiving fluids, having a base (10d) which surrounds a receiving volume for receiving the liquid, and a mouth section (10a) for feeding and/or removing the liquid, said mouth section (10a) having a first opening (32), via which liquid can be removed from the container (10). At least one second opening (34) is provided in the mouth section (10a) and serves to feed at least temporarily a gaseous medium to the container (10), the planes (E1, E2) in which the first opening (32) and the second opening (34) are arranged differing from each other.
