Abstract (en)
[origin: WO2014195008A2] The invention relates to a (cigarette) pack made of sealing film, which has an opening structure that can be used multiple times in the area of an inner front wall (26). By using a closure label (30) that can be used multiple times and is fixed by adhesive bonding, a removal opening in the pack film can be opened. The closure label (30) has lateral stabilization strips (32) which, as original parts of the closure label (30), are separated therefrom during the first use of the closure label (30). The stabilization strips (32) effect shaping reinforcement in the area of the inner front wall (26) Furthermore, (lateral) sealing seams – side seams (15, 16) – are arranged in a special way in order to ensure the box-like contour of the pack.
