Abstract (en)

[origin: WO2014195645A1] The invention relates to a protection system (1) for a device (2) for dispensing a product, in particular a cosmetic product, contained in a container (3), the system (1) including: means for attaching a lid to the container (3); a lid (11) including at least two protection portions (12, 13), wherein at least one of the protection portions (12, 13), referred to as movable, is rotatably mounted, the lid (11) being capable of adopting two end positions: a closed position and an open position; means (14) for actuating the lid (11) between the two end positions; the actuation means (14) including a ring (15) that is rotatably mounted on the attachment means and means (16) for transmitting the rotation of the ring (15) to the movable portion (12, 13) of the lid (11).
