Abstract (en)

[origin: WO2014191072A1] The invention relates to a formatting part for guiding containers (3) in a container treatment installation, having a first formatting part element (11, 29, 44) and a second formatting part element (12, 30, 45) spaced apart perpendicularly from the first formatting part element (11, 29, 44). To provide a formatting part by means of which different container sizes can be guided reliably through a container treatment installation, the perpendicular distance between the first and second formatting part elements (11, 29, 44, 12, 30, 45) according to the invention is adjustable.
