Abstract (en)

[origin: WO2014195045A1] The invention relates to a device (1) for dispensing water-soluble active-substance preparations (5, 6) into a toilet bowl, having an accommodating container (2) which is to be arranged in the toilet bowl, wherein the accommodating container (2) can be fastened on the toilet bowl, wherein the accommodating container (2) comprises at least a first chamber (3) and a second chamber (4), wherein the first chamber (3), when flushing water flows over into it, dispenses a first active-substance preparation (5) into the toilet bowl, and the second chamber (4), when flushing water flows over into it, dispenses a second active-substance preparation (6) into the toilet bowl, and wherein the chambers (3, 4) are configured such that the first active-substance preparation (5) and the second active-substance preparation (6) are dispensed into the toilet bowl at staggered intervals.
