Abstract (en)
[origin: WO2014195449A1] The invention relates to a repair kit (10, 10') for sealing conveying lines, in particular thick-matter or concrete conveying lines, comprising at least one sealing element (12, 12'), the sealing element (12, 12') being a monolith or a composite component and having a base body (14) and a coating layer. The repair kit is characterized in that the base body (14) is dimensionally stable and the coating layer has at least two layers, a first (16) and a second layer (18), the first layer (16) being arranged between the base body (14) and the second layer (18).
