Abstract (en)  
[origin: WO2014191554A1] The invention relates to a compact multi-level antenna including: a ground plane; a radiating element including  $n \geq 2$  portions extending in  $n \geq 2$  parallel planes in a planar pattern, the planes defining a volume above the ground plane, the radiating element including a first end connected to the ground plane and a second end ending with an open circuit.
