Abstract (en)

The present invention is related to an opening/closing device having an elastic piston for door wings of furniture complements. In particular, the invention is related to an opening/closing device that makes it possible to open and close door wings of wall units without the aid of handles and other gripping elements. The device is provided with a simple construction, easy to install and to adjust, wherein a fixing mounting plate to a piece of furniture is hinged to a supporting shell of a strike element.
