Abstract (en)
[origin: WO2014199308A1] The present disclosure relates to a personal protection device (10) for the protection of a portion of the body of a user. The device comprises an inflatable member (12) intended to protect at least partially a zone of the body of a user. The personal protection device (10) includes at least a first portion (20, 30, 40) of the inflatable member (12) and a second portion (21, 31, 41) of the inflatable member (12). The first portion (20, 30, 40) of the inflatable member (12) and the second portion (21, 31, 41) of the inflatable member (12) are superimposed in a corresponding overlapping area or superimposition area (A, B, C). The personal protection device (10) includes at least one connecting device or structure (50) associated with the first portion (20, 30, 40) of the inflatable member (12) and the second portion (21, 31, 41) of the inflatable member (12) in the superimposition area (A, B, C).
