Abstract (en)
[origin: WO2014198381A1] A flat touch-and-close fastener element, which is detachably connected to a second touch-and-close fastener element, thereby forming a touch-and-close closure, and which consists of a system of threads (10) comprising at least warp and weft threads as well as pile threads, is characterized in that the individual threads have different chemical and/or physical properties and, for this purpose, consist of different materials.
