Abstract (en)

[origin: WO2014198369A1] The invention relates to a bleaching-agent co-granule, which contains a bleach activator, a bleach catalyst containing metal and containing at least one ligand from the group of di- or trimethyl triazacyclononane or derivatives thereof, and a homo- or copolymeric polycarboxylate or salts thereof or products of partial neutralization having a pH value in the range of 3 to 9. The bleaching-agent co-granule is produced in a water-free granulation process, preferably by means of compacting, during which the temperature is held below 100 °C. The invention further relates to the use of the bleaching-agent co-granule in cleaning agents for the cleaning of dishes in a machine and a cleaning agent containing the bleaching-agent co-granule.
