Abstract (en)

[origin: US2014370894A1] Certain embodiment relate to public land mobile network resolution in a shared and a dedicated network. The method may include receiving, at the serving base station, a handover restriction list (HRL) comprising information on serving public land mobile networks (PLMN) or equivalent public land mobile networks (EPLMN) of the user equipment. The method may also include receiving a PLMN list comprising a plurality of PLMNs that are hosted by the target base station. The method may further include selecting a target PLMN for the user equipment using the HRL and the PLMN list, wherein the selected target PLMN is on the PLMN list but is not on the HRL. The method may also include sending a handover request message indicating the selected target PLMN for the user equipment to the target base station.
