Abstract (en)

[origin: CN105520424A] A modification device for an electric adjusting device used for a support device which is used to support a cushion of a seat and / or a bed, especially a mattress of the bed. The device comprises an auxilliary frame (100) which can be inserted between the support device and the cushion. The device comprises a base with at least two frame parts (104, 106) which can be swung under the traction force of a traction rope of a Bowden cable.
