Abstract (en)

[origin: EP3009563A1] A supplement (1) for concrete sleepers, to be applied on the upper surface of a railway sleeper (2) for modifying the geometry of said sleeper, wherein it comprises a lower surface complementary to the geometry of the upper surface (2') of the sleeper and at least one outer surface, and wherein the material of the supplement (1) has a Young's modulus lower than the Young's modulus of said concrete sleeper (2).
