Abstract (en)

[origin: EP3009565A1] A device that can be driven along a railway, and by the use of a wedge, press the rail-fastening clips in or out. Instead of a wedge hinged bars or pistons, powered by an electromagnet, electric motor or hydraulics, can be used. The device is constructed to, by the means of runners or wheels, follow rails and be kept in a position for pushing mentioned rail-fastening clips to or from rails.
