Abstract (en)
A construction system and method for setting up constructions with the appearance of gabions. The construction system comprises a plurality of stackable building blocks for setting up a supporting wall, a continuous wire mesh and anchoring elements for anchoring the wire mesh to the supporting wall, so that between the wire mesh and the supporting wall a gap is formed that can be filled with loose rocks. The stackable building blocks have protrusions and recesses that fit inside each other, for positioning the building blocks on top of each other, and grooves at the top for receiving the anchoring elements. The anchoring elements have a gripping element, arranged for holding the wire meshes.
