Abstract (en)
A plurality of exhaust pipes are respectively connected to a plurality of exhaust ports of a cylinder head. The plurality of exhaust pipes are arranged in a left-and-right direction to be spaced apart from one another and pass in front of and below a crankcase from the cylinder head to extend rearward. A first pipe that connects a water pump to a radiator extends forward at the right of a right side surface portion to a front surface portion of the crankcase and is curved leftward from the right of the right side surface portion in a front view of a motorcycle. Further, the first pipe passes through an inner region between a left end and a right end of the plurality of exhaust pipes to be connected to the radiator in the front view of the motorcycle.
