Abstract (en)
[origin: WO2014202943A1] A plastics jointing system comprises a first structure and a second structure that is joined to the first structure, wherein the first structure and the second structure are each unitary moulded plastics structures. The first structure includes a first connecting structure and the second structure includes a second connecting structure, the first and second connecting structures each having complementary locking formations that are engageable to connect the first structure to the second structure.
