Abstract (en)

[origin: WO2015022308A1] The invention relates to a method and a device for reactivating a train (13) which has an automatic train control (3). In order to save energy and manual effort, a train reactivation device (1), supplied independently of the train-side sub-systems (14), is provided for an event-triggered reactivation of the subsystems (14) of the train (13).
