Abstract (en)
[origin: WO2014203135A1] The invention discloses a packaging arrangement for the bulk handling of fluid material and being adapted to be located within an outer box and/or container, which includes an inner bag adapted to hold fluid material, the inner bag having a product inlet through which the fluid material can be introduced into the inner bag and a product outlet through which the fluid material can flow from the inner bag; and a surrounding member adapted to surround the inner bag and adapted to form at least one air pocket or air compartment between the surrounding member and the inner bag, the pocket having an air inlet through which air can be introduced into the pocket and thereby putting pressure on the inner bag to force the fluid material out of the inner bag through the product outlet.
