Abstract (en)
[origin: WO2014203037A1] A crate is disclosed comprising a rectangular base having left and right sides and front and rear ends, left and right hand side walls connected along the respective sides of the base, each side wall carrying at a front end and a rear end a pivoting frame member 40,42,44,46, each frame member comprising a first leaf and a second leaf, a first end of the first leaf being connected to an end of the side wall and a second end connected to a first end of the second leaf. The crate has particular use in the transport of motor vehicles such as cars, enabling packing to a high density in standardised large shipping containers.
