Abstract (en)
[origin: WO2014202611A1] The invention relates to a refrigerant condenser, in particular a screw compressor, comprising a compressor housing (12), a compressor element (26, 28) which is driven by a drive and which is arranged in said compressor housing, at least one bearing unit (62, 64) for at least one element of the drive, comprising at least one bearing housing (116, 118) and at least one roller bearing (112, 114) arranged in the bearing housing. Said bearing housing is supplied with a lubricant from a lubricant distribution system (104) and is associated with a lubricant dosing unit (152, 154) which comprises a filter receiving chamber (182) and a filter body (184) is arranged in the filter receiving chamber.
