Abstract (en)

[origin: WO2014202269A1] The invention relates to a diagnosis module (6) for vehicle diagnosis having a communication unit (18) which is designed for data transmission with the control device (4) of a motor vehicle (2); a diagnosis unit (20) which is designed in order to perform a diagnosis of the motor vehicle (2) on the basis of the diagnostic data transmitted by the communication unit (18); and a transmitter unit (22) which is designed in order to transmit diagnostic data from the diagnosis module (6) to a server (12). The transmitter unit (22) is designed to transmit the diagnostic data via a mobile communication network and/or the internet from the diagnosis module (6) to the server (12).
