Abstract (en)

[origin: WO2014202860A1] The invention consists of a hybrid cutoff member (100; 500) for an electric circuit comprising a static cutoff component (101; 501) and an electromechanical cutoff component, characterised in that the static component (101; 501) is fixed on a support (110; 510) bearing electrical contacts (111, 112; 511, 512) for the static component, said support (110; 510) being configured to move, on receiving a cutoff command, so as to withdraw at least one of said electrical contacts (111, 112; 511, 512) from the respective pin of same, thus forming said electromechanical cutoff component.
