Abstract (en)

[origin: WO2011131184A1] The invention relates to a floor pan of a vehicle, in particular of an armoured military vehicle, having a lateral floor wall (1) which is connected to a second floor wall (5) via a connecting point (9). In a first embodiment, additional armouring (4) for anti-mine protection, in particular an armour plate, is detachably fastened to the lateral floor wall (1), said additional armouring at least partially covering the second floor wall (5) that adjoins the lateral floor wall (1) and at least partially covering the interposed connecting point (9). In a second embodiment, an additional protective module (6) is detachably fastened to the lower floor wall (5), and the lower floor wall (5) and the additional protective module (6) are extended beyond the connecting point between the lower floor wall (5) and lateral floor wall (1) so as to form a projection (19) in the region of the fastening (12), wherein the fastening point is situated in said projection (19).
