Abstract (en)

[origin: WO2014206710A1] A device for filling a preformed tube with smokable material by means of pressurised fluid flow is disclosed, including a fluid outlet for releasing a pressurised fluid, tube receiving means; portion receiving means, located between the cigarette tube receiving means and the fluid outlet, for receiving the portion of smokable material prior to filling of the tube; the portion receiving means and cigarette tube receiving means are arranged such that when fluid is released from the pressurised fluid outlet, the smokable material is moved from the portion receiving means into the cigarette tube. A related method, consumable and system are also disclosed.
