Abstract (en)  
[origin: WO2014207524A1] The invention concerns a set of cutlery comprising an eating part, which is connected to a handle part and has the purpose of increasing the eating ability of particularly small children, which eat by themselves using the cutlery in question, and forcing to grasp the cutlery by the precision grasp. A device for a set of cutlery in question, which comprises a spoon piece and/or a fork piece having a handle connected to the proper eating part of the piece of the set of cutlery, comprises a handle having particular features. The handle (5, 6) has a grip part (15), which extends from the proper eating part (7) of the piece of the set of cutlery. The width (B) of the handle (5) is 1-10 mm and the handle (5) has a height (H) that exceeds said width (B). It is allowed for the user (19) of the piece of the set of cutlery (2) to grasp, by a so-called precision grasp, around the handle (5) of the piece of the set of cutlery (2) in question, i.e., between the thumb and at least one more finger.
