Abstract (en)

[origin: WO2014207222A1] The present invention relates to a method for tanker, preferably parcel tanker, construction. According to the invention the method comprises the steps of: - providing a hull having arranged therein at least one hold which is accessible via a hatch opening; - providing at least one self-contained tank module comprising a number of cargo tanks; and - arranging in the hold the self-contained tank module to provide a tanker, wherein the tank module is arranged in the hold such that the tank module and the hull are structurally independent and such that the tank module is removable via said hatch opening of the hold after a period of use of the tanker.
