Abstract (en)

[origin: WO2014206726A1] The invention relates to a method for representing three-dimensional objects (101, 102, 103; 201, 202, 204) displayed in a map view (100; 200) in a navigation system, in particular in the surroundings of a route displayed to a user in the navigation system, wherein a modification of a configuration status of the individual objects (101, 102, 103; 201, 202, 204) takes place by animation of the objects (101, 102, 103; 201, 202, 204). The invention also relates to a navigation system for carrying out said method. The described method and the navigation system for carrying same out exhibits great ease of use and - when used in a vehicle - enables an increase in traffic safety.
