Abstract (en)

[origin: WO2014207220A2] The invention relates to a multi-functional portable device (10) comprising a display module (2) driven by an actuator (3) and configured to be able to display one or more display functions simultaneously or sequentially; a control unit (12) configured to receive outside information (7) and control the display module (2) according to said one or more display functions, based on the received outside information (7); the device also comprising a computer medium comprising portions of code for a software application comprising a plurality of display functions, each of the display functions being configured to be executed in the multifunctional device.
